

# What PRC Regional Consultants have to say to Classroom Teachers and Related Service Providers

## ❖ We are here to help!

As Regional Consultants for the Prentke Romich Company, our job is to educate, train and provide support to you. Like you, we are special educators and speech–language pathologists. We are proud of our ability to understand your training and support your needs as you begin learning and implementing a PRC AAC device in your classroom.

## ❖ It really is just good teaching

You know your students well and what they need to excel in a learning environment. Teaching with an AAC device really is just the same good teaching you are doing already. We will help you learn to fold the device into your working routine with ease.

## ❖ Try your hand at being the student

In order to teach Unity, PRC’s language system, you will need to learn it. Take the time to explore and practice what your device user needs to learn. You will have more long–term success and so will your student. In addition, start small. Pick one activity, lesson or communication exchange to start with. You will give and get fantastic feedback from your student and can easily set your expectations at the same time.

## ❖ We have tools to make it easy

Our website, [www.prentrom.com](http://www.prentrom.com), offers a free software download so that you can practice without having to use the student’s device. In addition, we have a wealth of teaching materials already made and ready to use as well as the AAC Language Lab with pre–made lesson plans and activity ideas. We want you to be successful, and will do what we can to make teaching a student with AAC needs as seamless as possible.
